# Installation

`pdf2docx` can be installed from either PyPI or the source code.

## Install from PyPI

Type the command below for a new installation:

```
$ pip install pdf2docx
```

Or, upgrade this library with:

```
$ pip install --upgrade pdf2docx
```

## Install from source code remotely

Install `pdf2docx` directly from the `master` branch:

```
$ pip install git+git://github.com/ArtifexSoftware/pdf2docx.git@master --upgrade
```

**Note** [latest](#) ▼

In this way, `pdf2docx` might have a higher version than PyPI, which is not released yet.

# Install from source code locally

Clone or download [pdf2docx](#), navigate to the root directory and run:

```
$ python setup.py install
```

Or, install it in developing mode:

```
$ python setup.py develop
```

## Uninstall

```
$ pip uninstall pdf2docx
```

**This documentation covers all versions up to 0.5.13.**
